ABOUT ME

Business Information Systems graduate with a strong foundation in data analysis, business technology, and web development. Experienced in developing dashboards, analyzing data, and building full-stack web applications through academic projects. Passionate about transforming data into actionable insights using Excel, SQL, and Power BI while continuously expanding technical and analytical skills.

SKILLS

- UI/UX Design, Figma, Canva, MS office, SQL, Power BI, HTML, CSS, Python, problem solving, analytical thinking, creativity.

EDUCATION

Bachelor of Business Information Systems

University of Wollongong in Dubai – graduated in 2026

RELEVANT EXPERIENCE

Deloitte Australia

Sep 2025

Data Analytics Job Simulation on Forage

- Completed a Deloitte job simulation involving data cleaning and forensic technology, applying analytical approaches to ensure data integrity
- Developed interactive dashboards in Tableau to support data visualization and reporting, enabling clear insights for stakeholders
- Utilized Microsoft Excel to classify datasets, draw business conclusions, and adopt new features, demonstrating eagerness to learn advanced analysis techniques

PROJECTS

ElevateX – Smart Warehouse Management System

Collaborated on the development of an AI-powered smart warehouse management system integrating RFID scanning, QR-based shelf binning, demand forecasting, anomaly detection, and real-time inventory tracking.

- Built full-stack web dashboards using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL to automate warehouse operations and improve inventory visibility.
- Implemented analytics and monitoring features including shipment verification, sensor health tracking, and predictive inventory insights.
- Collaborated on system design, database management, and user-focused dashboard interfaces for operational efficiency.

Tools & Technologies: HTML, CSS, JavaScript, Node.js, Express.js, MySQL, MongoDB, RFID, ESP32, QR Code Systems

Interactive Boutique Sales Dashboard

- Designed an interactive sales dashboard in Microsoft Excel using Pivot Tables, Pivot Charts, KPI cards, and Slicers to analyze monthly revenue, sales quantity, and product performance.
- Cleaned and organized sales data to identify trends and present business insights through dynamic visualizations.
- Built an interactive dashboard allowing users to filter data and monitor key performance indicators efficiently.

Tools: Microsoft Excel (Pivot Tables, Charts, Slicers, Conditional Formatting)

Big Data Management and analytics project

- Collaborated with a team to assess Zoan Tyres' existing data collection, storage, and processing infrastructure, identifying gaps and improvement areas.
- Designed a modern data lake-based architecture and built sample ELT pipelines demonstrating optimized ingestion and processing workflows.
- Contributed to building Power BI dashboards that visualized business KPIs and demonstrated improved decision-making through real-time data insights.

Tools: Power BI, Azure, Data Lake Concepts, ELT

Recipe Sharing Website

- Built a fully responsive recipe-sharing platform using HTML, CSS, JavaScript, JSON, Node.js, and MySQL, ensuring a clean interface and easy navigation for users.
- Designed the frontend layout with emphasis on usability, accessibility, and intuitive interaction, enabling smooth browsing and recipe submission.
- Developed backend features for user authentication, recipe management, and database connectivity, ensuring secure

storage and retrieval of recipe data.

- Implemented dynamic components and API-style interactions to allow users to add, view, search, and manage recipes efficiently.

Veritas

- Collaborated in designing the UI/UX of a crime reporting platform using Figma, focusing on intuitive navigation and accessible user workflows.
- Created interface assets and presentation materials using Canva and Microsoft Word.
